

AIRTECH

PACKAGE TYPE AIR CHILLING PLANT

Efficient and fast cooling with Airtech Air Chiller

AIRTECH PACKAGE TYPE AIR CHILLING PLANT

Chilling through technological excellence !

- **Variable temperature range**
- **Compact Design covering minimum floor area**

Unmatched Chilling, Exception Features

Breakthrough technology the ensures optimum performance long life and easy serviceability, plus precision engineering, contemporary design, selection of appropriate materials, upgraded manufacturing process, assembling and testing services to ensure perfect quality control and compact and uncluttered equipment design.

Low cost Maintenance

Supreme Quality that requires low maintenance.

Customer Care

To take care of all your maintenance requirements. Single source responsibility cover including designing, manufacturing, installation and servicing by experienced and competent engineers.

SPECIFICATIONS

Model	AC-13	AC-20	AC-26	AC-40	AC-48	AC-60	AC-72
No. of circuit	1	1	2	2	2	2	2
Chilled Air Quantity (CMH)	1300	2000	2600	4000	4800	6000	7200
Temperature Range	4°-20°C						
Power Supply	AC 50Hz, 415 V, 3PH						
Compressor	Scroll / Screw / Semi Hermatic / Open Type						
Cooling Coil	Dx-Type						
Condenser	Air / Water Cooled						

Due to continuous product development and improvement specification and technical details are subject to change without notice

- Capacities are based on 10°C of chilled Air.
- For water cooled condenser, water inlet temp. should be 32°C Max.
- For Air Cooled Condenser, ambient temperature is 35°C.
- Higher capacity air chilling plants are also available on demand.

AIRTECH COOLING PROCESS PVT. LTD. (Formerly known as M/s Airtech Engineers)
